

FOR IMMEDIATE RELEASE

July 28, 2011

Powers and Sons LLC is awarded the Tie Rod Assembly business for the new independent suspension system on the MaxxPro Dash Military Vehicles

Plymouth, Michigan - AxleTech International, a General Dynamics company has selected Powers and Sons to provide Tie Rod Assemblies for the Independent Suspension Systems on 1,050 new International® MaxxPro® Dash Military vehicles.

This Independent Suspension Axle System enhances the MaxxPro vehicle's mobility and maneuverability to enable improved performance in the rough terrain of Afghanistan. Our Tie Rod Assemblies were selected because of the superior performance and endurance under these types of terrain.

We are proud to support our U.S. soldiers in Afghanistan and be a supplier on this mission-critical military program.

Powers and Sons LLC is a leading OEM automotive supplier that offers complete full service design and engineering expertise for steering and suspension systems and products such as tie rod ends, pitman arms, track bars and drag links. We also supply the military industries with the same array of products.

Powers and Sons LLC has been in business since 1932 and has operations located in Montpelier and Pioneer Ohio as well as Juarez Mexico.
